COLORED DIAMOND GRADING REPORT

NOV 09 1998

This Report is not a guarantee, valuation or appraisal. Its contents represent the opinion of the GIA Gem Trade Laboratory at the time of grading, testing, examination and/or analysis. The recipient of this Report may wish to consult a credentialed jeweler or gemologist about the importance and interrelationship of cut, color, clarity and carat weight.

At the time of the examination, the characteristics of the diamond described herein were based upon the following as applicable: 10X magnification (fully corrected tube and binocular microscope), millimeter net-weight, non-contact measuring device, ProportionScope, electronic carat balance, master and color comparison diamonds, additional visual color comparators, standardized viewing environment, bright source, ultraviolet lamps, spectroscopy, polariscope, specific gravity liquids, ultraviolet-visible and infrared spectrometers, X-ray fluorescence spectrometer, gamma-ray spectroscopy systems, beta radiation scintillation detector, radiation survey meter, X-ray luminescence equipment, and ancillary instruments as necessary. Red symbols on the plotting diagram below denote internal characteristics (inclusions); Green symbols denote external characteristics (blemishes). Symbols indicate type, position and approximate size of characteristics. Details of finish are not shown. Diagram may be approximate.
